

ABOUT ME

I was Initially drawn to Software Development for the challenge of learning a new creative tool. The creative potential of working with and understanding data greatly interests me. My background in Art and Design, coupled with my ability to develop software, fills a vital role that is needed in today's tech landscape. My greatest passion regarding Software Development lies in the intersectionality of UI/UX and functionally streamlined applications. I am interested in user friendly application development that incorporates carefully considered design principles with ease of use. I enjoy Software Development because there is a plethora of things to continually learn about and innovate with.

SPECIALIZATIONS

- Git/GitHub
- Single page applications
 - HTML5
 - CSS3
 - React.js
 - Bootstrap
 - API's
 - C#

PROJECTS

NUTSHELL

VERSION 1 | VANILLA JAVASCRIPT

VERSION 2 | REACT.JS

This project consists of a single page application that uses CRUD functionality along with local database information to display a social media style site. Users are given affordances to chat, add/remove friends, and to post articles and news sources on a public dashboard

CAPSTONE 1

REACT.JS

This project demonstrates a fictional business that is an indoor dog park. Featuring amenities such as a restaurant, a cafe, and a pet store, this site allows users to tailor a purchase plan to their choosing.
